S2. Stopword Lists, Stemming Rules, and Deduplication Protocols

S2.1. Stopword list

The following stopwords were removed prior to keyword co-occurrence analysis. Domain-specific generic terms were retained only when semantically necessary.

General English stopwords:

a, about, above, after, again, against, all, am, an, and, any, are, as, at, be, because, been, before, being, below, between, both, but, by, can, did, do, does, doing, down, during, each, few, for, from, further, had, has, have, having, he, her, here, hers, herself, him, himself, his, how, i, if, in, into, is, it, its, itself, just, me, more, most, my, myself, no, nor, not, now, of, off, on, once, only, or, other, our, ours, ourselves, out, over, own, same, she, should, so, some, such, than, that, the, their, theirs, them, themselves, then, there, these, they, this, those, through, to, too, under, until, up, very, was, we, were, what, when, where, which, while, who, whom, why, will, with, you, your, yours, yourself, yourselves.

Bibliometric stopwords:

article, author, citation, conference, document, editorial, journal, literature, paper, publication, review, study, studies, research, results, method, methods, analysis, data, approach, approaches, framework, model, models, system, systems, based, using, used, new, novel, high, low, optimal, optimization, control, lighting, light, indoor, smart, intelligent, energy, performance, evaluation, assessment, design, implementation, experimental, simulation, field, case, case study, experimental study, comparative, investigation.

S2.2. Stemming rules

A light Porter-style stemming procedure was applied. Acronyms and protocol names were protected from stemming.

Rule	Example	Output
Plural -s removal	luminaires → luminaire	luminaire
-ies → -y	strategies → strategy	strategy
-ing removal	lighting → light	light
-ed removal	optimized → optimiz	optimiz
-ation → -ate	optimization → optimize	optimize
-ization → -ize	normalization → normalize	normalize
-ally → -al	biologically → biological	biological
Acronym protection	MQTT, DALI, KNX, ECA, IFTTT, HH, GA, PSO, SA, ACO, DE, RL, MPC	unchanged
Hyphen normalization	hyper-heuristic → hyperheuristic	hyperheuristic
Case normalization	ZigBee, Zigbee, zigbee → zigbee	zigbee

S2.3. Deduplication protocol

1. **DOI matching:** Exact DOI match across databases.
2. **Title matching:** Normalized title (lowercase, punctuation removed, whitespace collapsed) using Levenshtein similarity ≥ 0.95 .
3. **Author matching:** First author surname + year + title similarity ≥ 0.90 .
4. **Manual adjudication:** Records flagged as ambiguous were inspected by two reviewers.
5. **Retention rule:** When duplicates were identified, the record with the most complete metadata was retained.

S3. VOSviewer Parameter Files and Thesaurus
